

A/B Testing Statistical Report

H0: Conversion rates are equal. H1: Conversion rates differ.

Control: 1000 visitors, 120 conversions (12.0%).

Variant: 1000 visitors, 145 conversions (14.5%).

Approximate $Z=1.64$, two-sided $p \approx 0.10$. At $\alpha=0.05$, fail to reject H0. The variant shows a higher observed conversion rate, but the evidence is not statistically significant with this sample size.
